

Roadmap Belajar Cybersecurity → Penetration Tester

Checklist 3 Bulan Pertama (Fondasi IT + Konsep Keamanan Dasar)

Centang setiap poin ☐ menjadi ☒ seiring progress kamu. Target: 1-2 jam belajar/hari.

Minggu 1-2: Networking Dasar

- ☐ Pelajari model OSI (7 layer) & TCP/IP
- ☐ Pahami subnetting (IP address, subnet mask, CIDR)
- ☐ Kenali port & protocol umum (80, 443, 22, 21, 25, 53, dll)
- ☐ Tonton seri Professor Messer - Networking (YouTube, gratis)
- ☐ **Praktik:** Install Wireshark, capture traffic jaringan sendiri, coba identifikasi paket HTTP/DNS

- Professor Messer YouTube: "Network+ Training Course"
 - Cisco Networking Academy (gratis, materi resmi)
-

Minggu 3-4: Linux Fundamentals

- ☐ Install Kali Linux (VM via VirtualBox/VMware, atau dual boot)
- ☐ Kuasai navigasi file system (`cd`, `ls`, `pwd`, `find`)
- ☐ Pahami file permission (`chmod`, `chown`, `ls -l`)
- ☐ Pelajari package management (`apt`, `dpkg`)
- ☐ Bikin script bash sederhana (loop, if-else, variable)
- ☐ Selesaikan TryHackMe path "Linux Fundamentals" (Part 1-3)

Sumber:

- TryHackMe: tryhackme.com/path/outline/linuxfundamentals
 - OverTheWire "Bandit" wargame (overthewire.org)
-

Minggu 5-6: Python untuk Security

- ☐ Dasar Python: variable, tipe data, loop, function
- ☐ File handling (read/write file)
- ☐ Library dasar: `socket`, `requests`

- ☐ **Praktik:** Bikin script port scanner mini
- ☐ **Praktik:** Bikin script sederhana untuk baca & parsing log file

Sumber:

- freeCodeCamp Python course (YouTube, gratis)
 - Automate the Boring Stuff with Python (buku/website gratis)
-

Minggu 7-8: Konsep Keamanan Dasar

- ☐ Pahami CIA Triad (Confidentiality, Integrity, Availability)
- ☐ Pelajari jenis serangan: phishing, malware, ransomware, DDoS, social engineering
- ☐ Kriptografi dasar: hashing vs enkripsi, simetris vs asimetris
- ☐ Access control: MFA, least privilege, password policy
- ☐ Selesaikan TryHackMe path "Pre Security" (full)

Sumber:

- TryHackMe: tryhackme.com/path/outline/presecurity
 - Professor Messer YouTube: "Security+ Training Course"
-

Minggu 9-12: Persiapan CompTIA Security+

- ☐ Ikuti full Professor Messer Security+ series (semua domain)
- ☐ Buat rangkuman catatan per domain (5 domain utama Security+)
- ☐ Kerjakan practice test (minimal 2-3 kali sampai skor konsisten di atas 80%)
- ☐ Daftar & ambil ujian CompTIA Security+
- ☐ **Refleksi:** Evaluasi jalur spesialisasi (tetap pentest / eksplor lain dulu)

Sumber:

- Professor Messer Security+ SY0-701 (YouTube + notes gratis di professormesser.com)
 - Practice test: ExamCompass (gratis) atau Jason Dion practice exam (Udemy)
-

Milestone Setelah 3 Bulan

Di akhir bulan ke-3, kamu seharusnya sudah:

- Nyaman pakai Linux command line
- Paham dasar networking & bisa baca traffic di Wireshark

- Bisa bikin script Python sederhana
 - Lulus/siap ujian Security+
 - Siap lanjut ke **Tahap Pentest Khusus**: OWASP Top 10, Burp Suite, TryHackMe "Jr Penetration Tester" path
-

Catatan Progress Pribadi

(isi sendiri tiap minggu: kendala, insight, atau hal baru yang dipelajari)

- Minggu 1:
- Minggu 2:
- Minggu 3:
- Minggu 4:
- Minggu 5:
- Minggu 6:
- Minggu 7:
- Minggu 8:
- Minggu 9:
- Minggu 10:
- Minggu 11:
- Minggu 12:
